Shop license.

Version 1.0.

This document is agreement between developer and bablosoft.
It is important, please read!

Definitions:
Script is application written in BAS.
Developer is person, who shares script publicly or privately.
User is person, who uses script written by developer.
Bablosoft is company, which developes BAS and delivers scripts to users.
Shop is the place, which contains list of all public scrits written by all developers.

Script types:
There are two types of scripts: *public* and *private*.
Public scripts are available to any user, who want to buy it.
All public scripts are visible in shop.
Private scripts are available only to users, to which access was granted by script developer.
Private scripts can be created only by premium developers.
Developer can become premium by bying product with name BrowserAutomationStudioPreimium.
Public scripts can be created by any developer including just registered. Therefore starting investment of public script developer is 0.
Bablosoft can view only public scripts, but not private.
Checkout of public script is done automatically: shop receives money from user, delivers distro and send money to developer.
Checkout of private script is done manually by developer, he must receive payment, add user and send him a distro.
Bablosoft fee from every sold copy of public script is 25%.
Developer can add temporary licenses, suspend license or trials with any license type.

Public and private script comparison:

	Public script	**Private script**
Requires premium	✖ No	✔ Yes
Fees from every sale	25%	0%
Visible in shop	✔ Yes	✖ No
Needs approval	✔ Yes	✖ No

	Public script	**Private script**
Sale type	Sale in shop in automatic mode	Developer creates users and receive payment manually
Temporary license, trial	✔ Yes	✔ Yes

Developer capabilities:

Use BAS to create scripts.

Sale unlimited script amount.

Get advantage of bablosoft billing system(receive payments automatically).

Update scripts for all users instantly.

Promotion. Your script will be visible to other shop users.

Manage users, update license, expire time or suspend it.

Withdraw money in convenient way.

Use BAS protection system, which prevents users to crack, copy, or see source of your scripts.

Choose payout type(webmoney or paypal).

Developer duties:

Provide support to your users. Developer of every script must provide support method - it can be skype/jabber account, topic on forum etc.

Fix bugs and update script accordingly.

Fix critical bugs(bugs which makes script unusable) asap.

In case if critical bug is not fixed during month, script may be banned.

Provide refund method, or inform users, that refund is not supported.

Bablosoft duties:

Provide payouts to every public script developer each Sunday every week. Bablosoft reserves the right to delay payment for a week without a cause.

Update and improve BAS engine.

Fix bugs in BAS. Critical bugs will be fixed very fast.

Provide support for BAS engine.
